"The assessment of our facility and processes was extremely thorough. It included detailed recommendations to transform our processes with proven methodologies designed to improve productivity and strengthen competitiveness. The SCMEP staff was knowledgeable, professional and responsive to our business needs and provided a valuable service at no cost."

- Karry Kirchner
Siemens Corporation

"One of the main values that the Competitiveness Review provided to the CCL organization was in the area of analysis and comparisons to an optimal manufacturing operation. This helped us 'benchmark' our existing operation and provided a "best in class" comparison to help us develop a structured approach to strategic visioning and planning."

- Jim Searcy
CCL Label

Helping South Carolina Companies Grow

SCMEP
SOUTH CAROLINA MANUFACTURING
EXTENSION PARTNERSHIP

Funded in part by the state, SCMEP is a private, non-profit group that serves as a proven resource to South Carolina companies, providing them with a range of innovative solutions and strategies to strengthen leadership, develop competencies, drive top-line growth, and improve productivity.

The one-day Competitiveness Review is the hub of SCMEP's business improvement services and the first step in our strategic, hands-on approach to help improve your company's performance. An assessment tool developed by SCMEP, the Competitiveness Review is a comprehensive on-site evaluation of your operations that appraises the capabilities and gauges the effectiveness of your business systems.

Why schedule a no cost Competitiveness Review for your company?

Because it:

- Won't cost you a penny
- Reveals (or confirms) the limiting factors holding you back
- Provides a snapshot (or, if conducted periodically, trended) view of how you're doing compared to other companies
- Gives you a road map to improve your competitiveness and grow your business

Underpinning SCMEP's methodology, the Competitiveness Review process is deliberately "built for speed" to permit rapid intervention into opportunities and shorten the "time to value" of projects:

- The Manufacturing Specialist's one-day on-site visit focuses attention on top priority technical and business challenges without requiring a lot of your precious time.
- Results are returned and/or presented to you within 5 – 10 business days in a report outlining your organization's strengths and weaknesses and listing recommended improvements.
- You receive a customized action plan featuring strategies and solutions designed to improve productivity, quality, profits, or sales, delivering maximum impact in the minimum time possible.

Become South Carolina's Next Business Success Story!

For some companies, the Competitiveness Review action plan is enough to get started. They may have the internal resources to execute the plan or may decide to pursue new initiatives or changes incrementally. For others requiring outside assistance in implementation, your SCMEP Manufacturing Specialist provides the solutions and the support.

A portion of your company's tax dollars contributes to state as well as federal grants that fund SCMEP, so why not . . .

take advantage of this valuable resource you help support that's here to help support you!

The Competitiveness Review enables SCMEP's Manufacturing Specialists to:

Analyze

Gain an understanding of your organization to identify the "limiting factors" – wherever they may occur – hindering your success.

Benchmark

Measure how competitive you are vs. other companies using a quantitative database-driven comparison .

Plan

Isolate which strategic and tactical business improvement actions will help you to raise your performance.
